

I want to express my appreciation to all Global Edge personnel for their proactive support to Milner Power Ltd. Global Edge has been a instrumental part of our day to day activities, beginning in early 2003 during the complete overhaul of our corporate network equipment and re-design of our network.

As we are located in a remote, mountainous region of Alberta, our reliance on top notch technical support is paramount. Global Edge has provided a high level of service, 24/7. As the Plant is a 24/7 operation and government regulations require "always on" Internet for filings, we depend on the high level of service provided by Global Edge.

Global Edge has very knowledgeable technicians who have provided Milner with ongoing suggestions for improving our network infrastructure. Their quick response to our requirements and needs allows us to keep the Plant running smoothly.

I would highly recommend Global Edge to anyone looking for superior IT Support Company.

Yours truly,

[signed]

Brian Hunt
